NEW

XP1

Safe working environment

- **Intuitive, multifunctional and wireless Foot Control** provides hands free operation allowing you to focus on your patients.
- **Integrated Disinfection system** guarantees a safe working environment for your entire dental team and patients.
- **Removable and autoclavable Ceramic Spittoon** for easy cleaning.

Superior Performance

- **XP1 is the new generation of dental equipment** designed and manufactured with meticulous care to deliver superior performance, outstanding reliability and an elegant design.
- **Ergonomically designed Doctors table** is setup with the following interchangeable instruments: Luzzani triplex syringe; Fibre optic high speed handpiece line, Curing light, 2 MC3LK Bien Air micro-motors and LED Satelec or EMS scaler.
- **The intuitive LED Digital touch pad** on the Doctor and Assistant sides, control the incredibly smooth chair movements, dynamic instruments and Faro Alya light.
- **Internal Peristaltic pump** supplies sterile saline solution for Oral Surgery and Implantology.

Assistant Table

is equipped with:

- Luzzani Triplex Syringe
- Cattani High and Low volume suction hoses
- Touch panel for the operation of the cup filler, bowl flush, treatment positions and light activation.

Ceramic Spittoon

is removable and autoclavable for easy cleaning. Cuspidor can rotate 180 ° for convenient patient access.

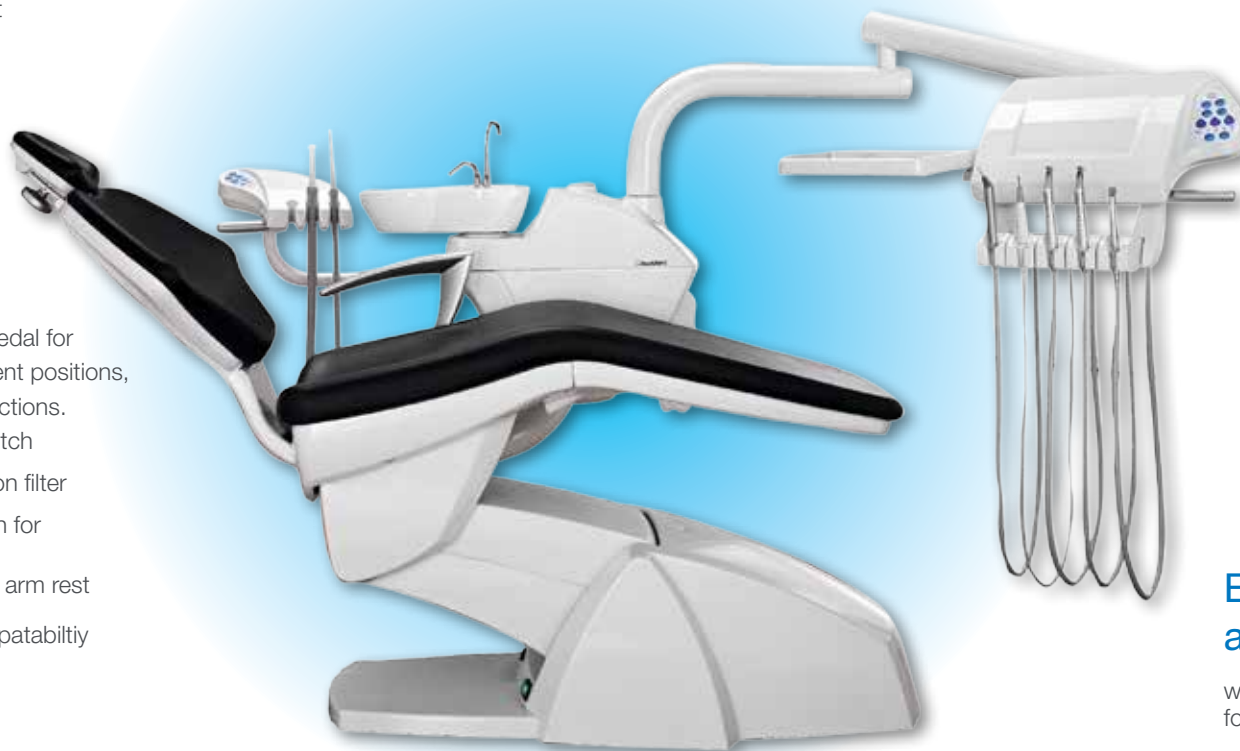

Unit mounted LED Operator Light

Provides perfect illumination and clarity during all treatment procedures.

Patient Chair

- Multi-functional foot pedal for easy control of treatment positions, LP, and instrument functions.
- Emergency cut off switch
- Easy accessible suction filter
- Trendelenburg position for emergency situations
- Optional foldable right arm rest
- Semi dry suction compatability
- Spittoon valve
- Place selector valve
- Large selection of vibrant colours

Doctors Instrument Table

Available in Traditional or Contintal style and equipped with the following:

- Luzzani Triplex Syringe
- 2 Fibre Optic High Speed Lines
- 1 Fibre Optic Bien Air Micromotor MC3 LK
- Space for Scaler
- Touch panel for the operation of treatment positions, instrument functions and light.

Ergonomically designed doctor and assistant stools

will ensure you and your team remain comfortable and focused throughout all your procedures.

Over the Patient or Cart System
Incredibly Reliable and Cost Effective Solution

- The cuspidor is made of glass for superior protection against chipping and staining. Easily removed for efficient cleaning.
- Arm mounted delivery system allows easy reach of the dynamic instruments and control panel.
- Suction filter is easy accessible and removable to help improve infection control.
- Doctor and Assistant Stools included.
- Designed with the following dynamic configuration: Triplex Syringe, 2 High Speed Fibre Optic lines, Low Speed line and space for scaler.
- Integrated control panel allows separate programming for 3 operators respectively.
- Unit mounted hands-free operating light provides a choice of 3 intensity levels ranging from 15,000 to 25,000 Lux.

Suction Motors Semi-Wet System

Patented technology to guarantee 100%
Air and Water separation

No need to install Water Separator in the dental unit.

DMEGA Suction Motors are available in various sizes to suit
all surgeries, anywhere from 1 to 4 dental units.

S101
1 Dental Unit
280 litres per minute

Teravac 3000
2 Dental Units
750 litres per minute

Teravac 5000
3 Dental Units
1100 litres per minute

Teravac 6000
4 Dental Units
1400 Litres per minute

DMEGA Teravac 6000 is the most powerful and responsive suction motor with variable speed, high airflow and amalgam retention unit that caters for up to 4 surgeries simultaneously. It monitors the vacuum levels and adapts accordingly to provide efficient and consistent suction.

The patented innovative design uses 2 cyclone impellers to guarantee 100% air and liquid separation. Furthermore, the implementation of the patented Triple Wing System and auto drain valve, releases residue from the separator thereby reducing blockages, maintenance and ultimately costs.

The intelligent system is equipped with a digital display that supplies information on vacuum levels, temperature, voltage, amps and error codes.

An optional amalgam retention
device, available for all motors.

Compressors

The dental compressors by Nardi Compressori are
manufactured to deliver OIL FREE, DRY AIR.

Oil residue can damage handpieces and fine pneumatic controls in the dental units. An oil free compressor is vital in protecting the health of your staff in addition to your equipment.

Tanks are furnace painted on the inside and outside using epoxy electrostatic dust and available in 25L, 30L, 50L and 90L.

Extreme Silent 30 L
2 Surgeries
64 dB

Extreme Dental 50 L
2-3 Surgeries
73 dB

Extreme Dental 90 L
3 Surgeries
73 dB

NEW 3 Stage Water Filter

Designed for Australian standards by one of the countries most respected and experienced technicians, the **RM 3 Stage Water Filter** is a must for all surgeries.

The process begins when large contaminated particles are eliminated through the first filter. The purification continues to the silver impregnated filter which removes taste, odour, chlorine, chemical reductions and pathogens. Finally, the sediment filter ensures delivery of purified, clean water ideal for all dental applications.

- Increases longevity of equipment
- Significantly reduces corrosion and malfunctions on water carrying components
- Reduces blockages in instrument tubing and turbine handpieces

DCI Delivery Systems

DCI

All DCI delivery systems are equipped with the following:

- DCI Triplex Syringe
- Highspeed Fibre Optic Line (optional 2nd line available)
- Individual drive air and water coolant controls
- Low Speed Fibre Optic Line
- Space for scaler
- Wet/Dry foot control

Series IV Cart System

Series IV Unit mount

Recessed model

- Flush lid design provides additional work surface.
- Recessed cover collects condensation
- Recessed Model available in the following sizes: 12.3L, 13.7L & 24.6L

L & R SweepZone AglON

- Antimicrobial-coated housing provides a continuous shield from bacteria, mould and fungi to keep your equipment clean and safe.
- SweepZone Technology sweeps through the entire tank resulting in a total clean of all instruments irrespective of their position in the tank. Eliminates hot spots and weak areas!
- Digital Touch Pad allows easy control of the functions.
- Stainless Steel housing and lid means it is corrosion, rust and fingerprint resistant.
- Sizes include: 4L and 12.3L

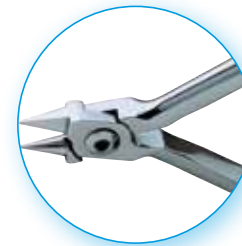

L & R EFFICA E7 3.5 L

- Automated locking lid locks when cycle begins and unlocks when cycle is complete. This ensures optimal instrument processing by eliminating instruments from being added or removed during the infection control cycle.
- Quite Operation
- New contemporary design compliments any décor.
- Improved draining system results in 65% faster draining.
- Lid fully encloses beakers during use.
- Full line of accessories available for greater versatility.
- Cleans dentures, crowns, partials and bridges. Removes tartar, cements and more.
- Redesigned basket allows for improved ultrasonic energy flow.
- Raised bottom allows for ultrasonic waves to properly form beneath the instruments for a quieter more thorough cleaning.
- Overall Dimensions 37.5 x 26.7 x 26.7

Algimax Mixing Machine

Work with perfectly mixed, bubble-free alginate every time with your brilliant durable little benchtop machine.

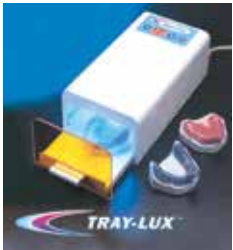

Designed for use with any alginate or stone, this robust simple device mixes three scoops in just 11 seconds with no dust or waste. Never hand mix again.

"I bought 2 of these machines for my practice... I was so impressed, I now own 14!"

- Dr Joseph Geenty
Wollongong Orthodontist

Tray Lux - Light Curing Tray

Stable balanced curing device with a wide tray of even thickness ensuring uniform curing. Suitable for use with composites and other resin materials.

Capsule Mixer

VERY QUIET
2 memory mode settings, adjustable time 1 to 30 sec, controlled consistent mix.

Led Curing Lights

Blue Lex 'Pen-Style'

Cordless ergonomic design > 800mW/cm², complete polymerisation in 10 seconds.

Cordless Light 'GT-1200'

3 light output modes, built-in radiometer. Up to 1000 mW/cm².

Professional Tooth Whitening

BEYOND Max 10 Treatment Kit is a clinically proven professional whitening system suitable for use with ANY bleaching light.

The Advanced Formula uses a 35% Hydrogen Peroxide based gel. Treatment sessions consist of 3 x 10 minute applications. The results are beautiful white teeth in less than 1 hour.

Melag B Class Autoclaves

The Melag 41B+ Premium Class is a standalone autoclave. Simply fill with water, connect to the power supply and select your cycle.

World's largest colour touch display enables easy program and cycle selection. Sterilisation run, log and other information is displayed in a clear, easy to read fashion.

Record sterilisation times include: 17 minutes for wrapped instruments and 10 minutes for unwrapped instruments. Both programs include fractionated pre-vacuum and drying.

Soredex Imaging Plate System Diagora Optime

Phosphor Plate digital imaging system used to capture, scan and download images.

- Fast readout time 4-7 seconds
- Supports up to 8 workstations
- Imaging Plates available in 0,1,2,3, and 4C Comfort Occlusal™
- Occlusal Software Stitching

SOREDEX

Viruskiller Air purifying system

The Viruskiller is a standalone high powered air purification system specially designed to clean and immensely improve room air quality. 99.99% success in inactivating influenza viruses, sterilising pneumonia viruses and removing hard to detect fungi.

99.90% success rate of removing fine dusts which cause pulmonary diseases.

Surgery Lights

The FARO ALYA light, designed with 2 LED lights provides a constant colour temperature (equal to 5,000k) at every level and produces the smallest shadow. The Faro Alya light is suitable for ALL dental chairs and is available as unit or ceiling mounted.
